

Foreseeing the cryptocurrency boulevard!

Let's get futuristic! Cryptocurrency debit cards have taken the world by storm. January 5, 2018, saw bitcoin debit cards become inactive. There was no forewarning provided, and this took users by surprise. The company that was giving away bitcoin debit cards were asked to shut down entirely for unknown reasons. This incident stirred curiosity and fear amongst the debit card users. Let's look into some of the issues faced by the cryptocurrency debit card users.

- The growth of cryptocurrencies has created a fear in the banking sector which could have adverse effects on the users
- When the firm that provides the debit cards does not follow the operating rules, it creates havoc in the lives of cryptocurrency users
- If the firm does not hold appropriate licenses, that becomes a problem

While these might seem insignificant to a layman, they are the primary factors controlling the debit card system. How bad would it be when you have big plans, but the debit card system shuts down, leaving you helpless? BetCoin cares. BetCoin issues debit cards with the aim of making cryptocurrencies a part of our everyday lives. You might wonder what's new? Let's spend a few minutes to understand the features:
